

NOMADe IMU: How to update firmware

Tutorial for Android

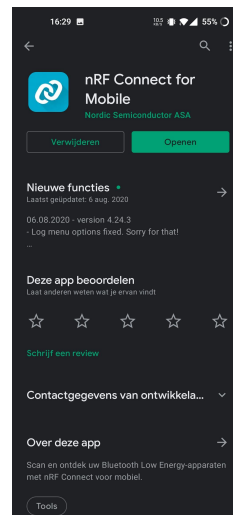

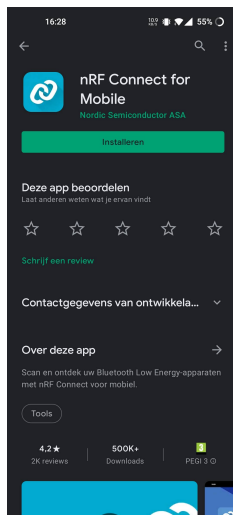

Step A: Installing nRF Connect

- Open Google Play Store

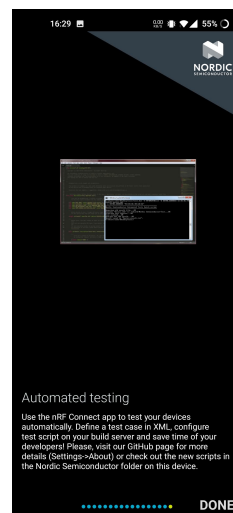

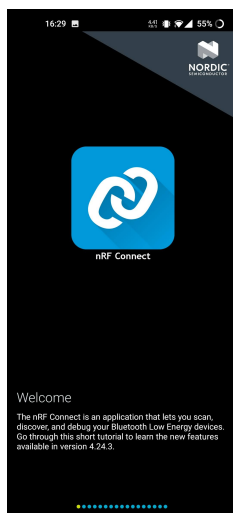

Google Play Store

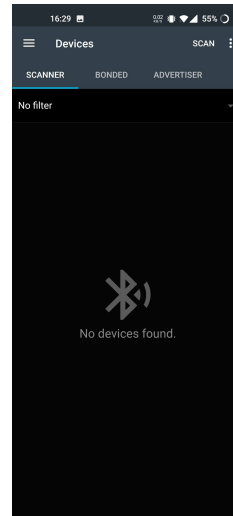

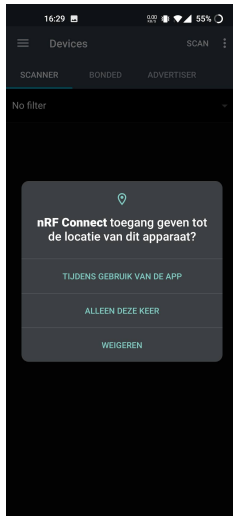

- Search for "nRF Connect for Mobile" and click "Install" then click "Open"

- Skip through all the steps and click "Done"

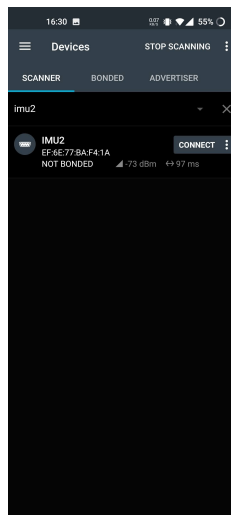

- You will see this screen, **accept** al necessary **permissions**

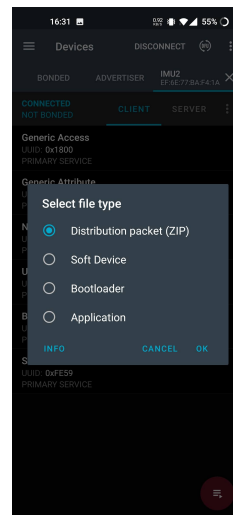

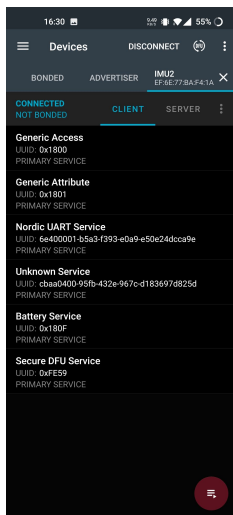

Step B: Finding IMU

- Click "**Scan**" and a list of devices will show up - Choose the device you want to upgrade:
Example "IMU2"
Click "**connect**"

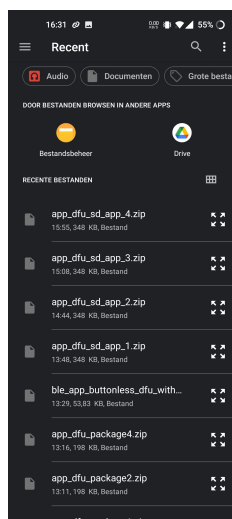

Step C: Performing the update

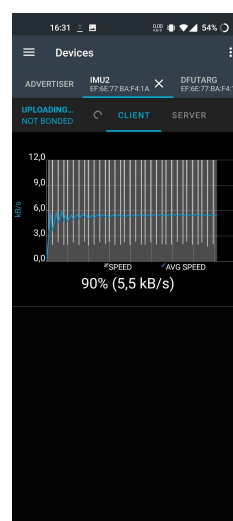

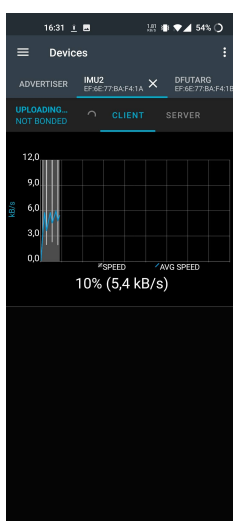

- Click "**DFU Button**" in the upper right corner, select "**Distribution packet (ZIP)**" and click "**OK**"

- Choose the desired **firmware version** - Example: "**app_dfu_sd_app_4.zip**"

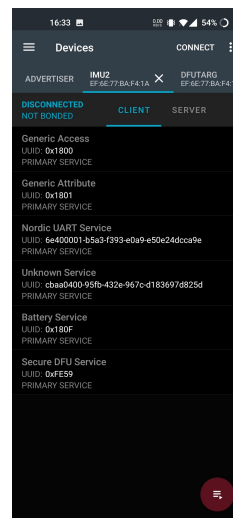

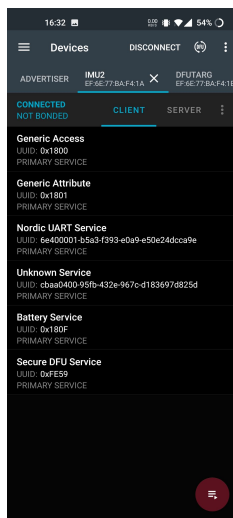

- **Firmware loading** will start

Step D: Finishing up

- When firmware **update** is **completed**, click "**DISCONNECT**"

- NOMADe IMU** modules are now **updated** and **ready to use**
